

Maturity level	Trigger pattern	Autonomy	Typical tools
-----------------------	------------------------	-----------------	----------------------

Assistive	Human prompt required	Low	Search, summarization
------------------	-----------------------	-----	-----------------------

Knowledge	Context triggers retrieval	Medium	RAG, document analysis
------------------	----------------------------	--------	------------------------

Action	Event triggers execution	High	APIs, databases, workflows
---------------	--------------------------	------	----------------------------

Multi-Agent	Agents coordinate autonomously	Very High	Inter-agent messaging, orchestration
--------------------	--------------------------------	-----------	--------------------------------------
